STRETCH CEILING

WELIGHTING

Illumination serves more than the obvious purpose of providing visibility – it can also set an ambiance, establish a mood and even alter perception. Good lighting design strikes the perfect balance between aesthetics and technology to reimagine any space into something extraordinary.

Our team of professional are dedicated to supporting your interior design project from start to finish. Our specialists provide thoughtful style consultation and source the latest in-trend lighting fixtures, as well as create custom luminaires based on technical reports. Throughout the entire process, our experts strive for excellence providing comprehensive test and commissioning support along the way.

WE Mission

WE strive to provide the best lighting product and service every step of your project, as the WE success is built on the relentless commitment to satisfy our customers.

WE Value

WE perfect every area of our lighting solution service. WE believe that never-ending innovation is the cornerstone of our daily work.

QUALITY

To ensure that we deliver the best possible services, our R&D team is dedicated to providing you with a high standard of technical knowledge .

They are responsible for new technology investigation and development as well as sourcing components from reputable suppliers in order to make sure all projects run smoothly without any hiccups along their journey.

CUSTOM-MADE

A stylish design goes beyond the visual appeal of a space. It's also about the comfort and quality experience a space offers to its users.

No matter whether you are seeking to save energy, maximize comfort, or get a personalized scene that can be transformed at the flick of a switch, we tailor-made lighting control solutions for homes, stores, offices, or even outdoor spaces.

SHOWROOM

WE showroom and office locate in Lai Chi Kok, and we will have regular event and seminar for technical presentation as well as leisure gathering. We sincerely invite you to visit our showroom anytime.

Stretch Ceiling

Experience the exceptional potential of our unique Stretch Ceiling system, which opens up new dimensions in design. Our versatile tracking system allows for installation as a sleek flat ceiling or in a variety of shapes, including pitched, curved, vaulted, domed, and circular forms.

This innovative system provides a wide palette of colors and textures, enabling you to create ceiling features that range from minimalist and elegant to vibrant and eye-catching, along with stunning lighting effects.

What Is Stretch Ceiling?

A Stretch Ceiling is a suspended ceiling system made up of two primary components:

a perimeter track and a lightweight fabric membrane that stretches and clips into the track. Beyond ceilings, this system is versatile enough to be used for wall coverings, light diffusers, floating panels, exhibitions, and various creative shapes.

Stretch Ceilings enable the integration of all types of light fixtures, grilles, and mounting points thanks to a proprietary background support system.

Frame Height:
50mm only
and even narrower*

Ultra Wide
Spread Lens

We use LED strips with ultra wide spread lens, which enhance the light source for maximum presentation.

This also allows for a reduction in the height limitations of stretch ceilings, cutting them down to half or even more compared to traditional 100mm. This is beneficial for design.

*Frames narrower than 50mm are available upon request.

WELIGHTING | Stretch Ceiling Application

Fabric Material

Our fabric material is a 0.2mm thick, fully recyclable PVC-based stretch membrane. It offers a wide selection of colors and finishes, including matte, satin, lacquer (mirror-like), metallic, perforated, and translucent options for lighting diffusers, backlighting, and projection.

This material can be printed or painted for enhanced effects and is entirely waterproof, washable, and impermeable to vapor.

Additionally, it is maintenance-free, hygienic, and non-toxic.

Integrated Options

The stretch material accommodates all types of light fittings, grilles, and sprinklers.

Alternatively, grilles or apertures can be set at different levels to create unique forms.

Downlight

Smoke Detector

Sprinkler

Mounting Track

The semi-concealed track, typically made of aluminum or PVC, is the preferred choice for architects and designers. It allows for the easy creation of curves, domes, vaults, and various other shapes.
