Detect nearby people and light changes

- Light detection: Automatically adjust screen brightness
- Distance detection: Screen wakes up automatically when people is detected within 30cm

Empowered by AIoT

Break through the boundaries of smart home ecosystem

· Works with Amazon Alexa and Google Assistant

Three interaction modes

APP interaction

Control your devices
from anywhere, anytime

Touch screen interaction

Touch screen offers a complete view
and places operations literally at your fingertips

Button interaction

It is appropriate for people of all ages

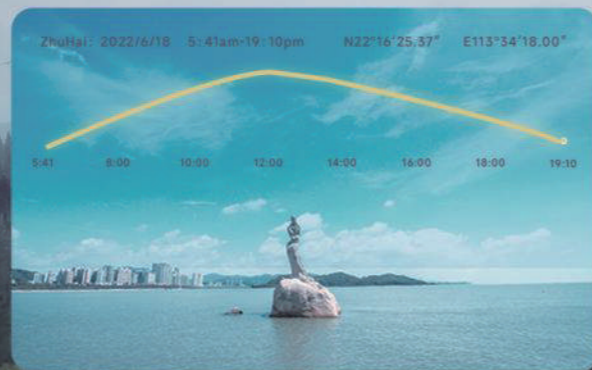

Adaptive Lighting

Match the needs of human biological cycles

Applications (no settings required)

Circadian Lighting

Home AI can get the weather forecast and mimic the intensity and color temperature of natural light throughout the day to support human circadian rhythm.

Super Applications

Customized Circadian Lighting

Customize circadian lighting curves that meet the demands of lighting in residential homes, hotels, offices, supermarkets, schools and hospitals.
